all

**Client**

**Bombay International School**

**Location**

**Mumbai, Maharashtra  
India**

**Size**

**370 students**

**Solution**

**iSchool V 4.6**

- **School Overview**

Bombay International School was established in 1962 by a group of parents who believed that education is a true learning process and not a structured way of imparting information. The key to learning was and is a small class size and a very high teacher – student ratio of 1 teacher to 15 students. We continue to believe in child – centered education in which we see the school as a medium through which the individual child can learn and develop; the school is for the benefit of the children and not vice versa.

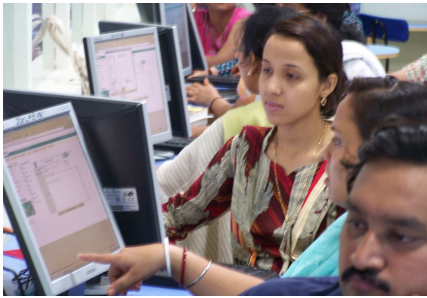

- **Problem Specification**

The existing software used at the school was Lyceum. The major problem faced by the school was that the organization failed to provide adequate training support to the end users. The delivery model was not user friendly, which caused non usage of the software as a result.

- **Solution**

The following modules were implemented by Ceon Solutions and services were rendered understanding the requirement of the school:

1. Academic Plan
2. Time Table
3. Results
4. Student Detail Profile
5. Student Attendance
6. Student Leave
7. Online PTA HR Profile
8. HR Attendance
9. HR Leave
10. News
11. Mail

- **Results**

- Easy access to complete information related to every child
- SMS alerts and email provides better productivity and work plan
- Easy access to detailed time table
- Greater focus on teaching
- Instant communication with all stakeholders
- Better level of satisfaction among parents as each child is taken care of personally

- **User Feedback**

*“Ceon solutions customized the modules as per our requirement and successfully integrated the system with complete data entry” – IT Administration.*
